In order to access the Hermitage School District Guest Wireless Network, you must have a guest account. Guests of the district can request an account by contacting the District Technology Office at 3026.

To access the HSD-Guest wifi
1. Join the HSD-Guest SSID. It does require a password to join.
2. As soon as you are connecting, you will be presented with a login portal. Use the login username and password you received from the District Technology Office to connect.

Notes:
● Depending on the business being conducted in the district, your account will either require you to login each day or the first time the device connects.
● All Guest Internet Access is Filtered and Logged. Violations of the Acceptable Use Policy, as listed on the login portal, could result in your HSD-Guest wifi privileges being revoked.
